What is Spain's battery storage market?

Spain's battery storage market is dominated by customer-sited systems. Utility-scale storage remains nascent. Currently, Spain's storage market is mainly composed of small-scale batteries co-located with solar PV. Spain's household electricity prices now stand at over EUR 0.30/kWh on average.

Is price arbitrage a viable business model in Spain?

Price arbitrage is not yet sufficiently attractive in Spain as a stand-alone business model.<sup>30,31,32</sup> Revenue stacking is currently not allowed.<sup>33</sup> The risks with regard to double charging remain unclear.<sup>34</sup> Capacity markets are not yet attractive for developers of storage assets in Spain.

Does Spain have a storage market?

Currently, Spain's storage market is mainly composed of small-scale batteries co-located with solar PV. Spain's household electricity prices now stand at over EUR 0.30/kWh on average. In addition, Spain's reliance on fossil gas has increased price volatility in recent years.<sup>16,17,18,19</sup>

Does Spain have a storage policy?

However, the government is developing new schemes to incentivise storage deployment, including adapting capacity markets under a new scheme named 'Renewable Energy Economic Regime'. In addition, Spain has recently introduced subsidies specifically for storage systems co-located with solar PV.<sup>35</sup>

Companies planning to enter or expand in Spain Liquid Cooled DC Charging Pile Market, local businesses seeking to benchmark performance, investors, consultants, and ...

Installation prices are integral to the overall investment surrounding battery energy storage charging piles. These costs are influenced by the complexity of the site, labor rates, ...
