A couple of common things I see on container builds is the insulation and venting in those containers. They have an estimated R value of negative 50 and condensation is a common thing to ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Get free shipping on qualified Off Grid Solar Systems products or Buy Online Pick Up in Store today in the Electrical Department.

Detailed walk-through of the planning and installation of our 3kW - 5kWH - 120V off-grid solar system that powers a rehabbed shipping container. Use to build your own system simply and safely.

Fit your container roof with gutters and a first-flush diverter to direct the cleanest rainwater into storage tanks made of food-grade plastic or stainless steel.

Many customers explore off grid solutions due to the simplicity and maneuverability of our containers. As long as a truck can get to the plot of land, we can drop your container. Now you have the option to go fully off grid with a few other add-ons, ...

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

This could power a tiny home or other small off-grid setup like a hunting cabin. For me though, I'll start with just keeping my electric tractors and motorcycles charged!

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels.

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no shading from a remaining container structure.

A couple of common things I see on container builds is the insulation and venting in those containers. They have an estimated R value of negative 50 and condensation is a common thing to deal with. Just something to look into ...
