These desk-top equipments will enhance your R& D or prototype project related to rechargeable battery pack, and even can fulfill your needs to make small quantity of customized packs.

We provide a full range of R& D equipment for cylindrical batteries, pouch batteries, and coin batteries, from grinding to final testing equipment.

A prismatic battery assembly line is an industrial machine used for the automated manufacturing of prismatic (rectangular or square) lithium-ion battery cells. Prismatic cells differ from ...

This line mainly realizes the entire production process of square shell battery packs, with a total length of 16 meters. The entire line is composed of the following equipment combinations:

The production line is used for automatic assembly, cleaning, dispensing, stacking, welding, testing and other processes from square energy ...

High quality Square Battery Production Equipment from China, China's leading battery assembly equipment product, with strict quality control battery pack assembly equipment factories, ...

This line mainly realizes the entire production process of square shell battery packs, with a total length of 16 meters. The entire line is composed of the ...

Our machines include single cell capacity testing, laser cleaning and welding, BMS testing, and battery aging equipment to ensure consistent performance. Join our satisfied customers in ...

High quality Square Battery Production Equipment from China, China's leading battery assembly equipment product, with strict quality control ...

It is used for power battery pack/energy storage battery pack square aluminum case battery pack assembly, and is composed of upper and lower double speed chain lines.

Made with chemicals safer for human health and the environment. Nordic Swan certified products comply with product-specific environmental, health and quality requirements in all relevant ...

The production line is used for automatic assembly, cleaning, dispensing, stacking, welding, testing and other processes from square energy storage batteries to energy storage modules
