This is based on a 0.33 F supercapacitor. If someone got an idea for why my RTC sink 50µA instead of 300nA It's most probably the DFLS130L-7 schottky diode. Take a look at ...

I am building a hobby project - a sort of supercapacitor powerbank, where I basically connected twelve 500F 2.7V supercapacitors in series. Despite these capacitors ...

I am designing a logger system with an ESP32 in which the logs are uploaded to the IoT cloud and parallelly logged to a local SD card. On Power loss detection, I want the ...

Choosing the Right Supercapacitor for your Application Wurth's ANP012 | How does a Supercapacitor age? Lifetime Model of Electric Double Layer Capacitors also gives ...

I am working on adding a super-capacitor to one of my 5V lines. Foolishly I tried adding the super-capacitor directly to the 5V line, but it over stresses my regulator to charge it ...

I have been watching videos on super capacitor jump starters for cars. I figured out about 90% of how they work, but there is one last thing I don't understand. The jump starters use a boost ...

A supercapacitor bank is connected in parallel with a lead acid battery to stabilize the supply. However, in the market, I can only find 16 Volt capacitor banks.

I'm trying to calculate the approximate leakage current for some capacitors I have. They are 5F 2.7v supercapacitors. I charged them up to 2.69v using a precision bench supply ...

Is this discharge normal? Is it possible that the capacitor is low-quality with high leakage? Do I understand this topic correctly? Did I miss any important info about super ...

Supercapacitor production in Honduras
