Is putting solar panels on roofs a solution in Syria?

"The solution to the problem isn't putting solar panels on roofs," Syria's interim Energy Minister Mohammad al-Bashir told The Associated Press. "It's securing enough power for the families through our networks in Syria. This is what we're trying to do."

What is Syria's Energy Plan?

The plan will look at Syria's projected energy demand and determine how much of it can come from renewable sources.

How many megawatts does Syria need?

Al-Bashir said Syria's infrastructure that has been repaired can provide 5,000 megawatts, about half the country's needs, but fuel and gas shortages have hampered generation. With the sanctions lifted, that supply could come in soon.

What was Syria's biggest city like in 2019?

Syria's largest city was mostly pitch-black, the few speckles of light coming from the other households able to afford solar panels, batteries, or private generators. Al-Jenan went thousands of dollars in debt to buy his solar panel in 2019.

The market demands brand new outdoor power systems that combine durability with smart energy management. From Aleppo's reconstruction sites to Homs' agricultural zones, users ...

Syria's renewable energy sector is evolving rapidly, with outdoor energy storage solutions becoming critical for stabilizing power supply in remote areas. This article explores the market ...
