Traditionally, systems thinking support has relied on an ever-increasing plethora of systems tools, methods, and approaches. Arguably though, such support requires something ...

Systems Systems is an international, peer-reviewed, open access journal on systems theory in practice, including fields such as systems engineering management, systems based project ...

Systems publishes Special Issues to create collections of papers on specific topics, with the aim of building a community of authors and readers to discuss the latest research and develop ...

How proactive digital engagement can help governments, insurers and providers improve health outcomes and cut costs in healthcare systems around the world.

The growing need for sustainable energy solutions has propelled the development of Hybrid Renewable Energy Systems (HRESs), which integrate diverse renewable sources ...

About Systems Aims Systems (ISSN 2079-8954) is an international, peer-reviewed journal on systems theory, practice and methodologies, including fields such as systems engineering, ...

Systems requires that authors publish all experimental controls and make full datasets available where possible (see the guidelines on Supplementary Materials and references to unpublished ...

Urban air and water pollution is complex. Cities must adopt systems thinking to tackle these challenges, boost equity and build long-term resilience.

Interests: model-based systems engineering and integration; systems modeling, analysis, and design of cyber-physical systems and digital twins; algorithms and computational tools for ...

The Internet of Things is currently one of the fastest-growing branches of computer science. The development of 5G wireless networks and modern data transmission protocols ...
