Add a try/catch block, if the transaction succeeds it will commit the changes, if the transaction fails the transaction is rolled back:

Looking at the SQL Server Books Online, Microsoft seems to have an (incorrect) method of handling nested transactions in a stored procedure: Nesting Transactions Explicit ...

The good news is a transaction in SQL Server can span multiple batches (each exec is treated as a separate batch.) You can wrap your EXEC statements in a BEGIN ...

I am trying to use transaction blocks on a SQL-Console with an Oracle DB. I'm used to use transaction blocks in PostgreSQL like BEGIN; <simple sql statement> END; but in ...

What is the proper way to test for insert/update failures and rollback this transaction if there are any? I don't think what I have will work since my inserts/updates are 3 ...

A transaction is a unit of work that you want to treat as "a whole." It has to either happen in full or not at all. A classical example is transferring money from one bank account to ...

I have a long running process that holds open a transaction for the full duration. I have no control over the way this is executed. Because a transaction is held open for the full duration, whe...

Do u think there is a better way to write a transaction in t-sql? Is there a better approach that improves maintainability and performance of the application that uses this ...

Transaction Conditions for Seismic-Resistant Budget Scheme for Photovoltaic Energy Storage Containers
