When will Chinese-origin lithium-ion non-EV batteries be taxed?

Tariffs on Chinese-origin lithium-ion non-EV batteries are scheduled to increase to 25% effective January 1, 2026. Otherwise, batteries of non-Chinese origin storage batteries have not been subject to multi-front targeted tariff or duty actions.

How much will China's Lithium-ion battery tariff increase in 2026?

For energy storage, Chinese lithium-ion batteries for non-EV applications from 7.5% to 25%, more than tripling the tariff rate. This increase goes into effect in 2026. There is also a general 3.4% tariff applied lithium-ion battery imports. Altogether, the full tariff paid by importers will increase from 10.9% to 28.4%.

What is the tariff on lithium ion battery imports?

As there is also a 3.4% general tariff on lithium-ion battery imports, the full tariff paid by importers will go from 10.9% to 28.4%. Lithium-ion battery modules, packs, and container blocks are generally categorized under the import code 8507.6020 if they are used for non-EV applications.

How will the new lithium-ion battery tariff affect integrators?

The increase in the total non-EV lithium-ion battery tariff from 10.9% to 28.4% will raise total costs for U.S. integrators from 11-16%. Cost increases will be higher for those who add less value in the United States (i.e., those who procure containers or racks from China v. modules or cells).

From the first of October, lithium-ion and other MCS-certified batteries up to one megawatt-hour per site will carry zero VAT when ...

The increase in the total non-EV lithium-ion battery tariff from 10.9% to 28.4% will raise total costs for U.S. integrators from 11-16%. Cost increases will be higher for those who add less value in ...
