-----

Batteries and green molecules are essential for reaching net zero. Batteries provide short-term grid flexibility, while green molecules decarbonize hard-to-abate sectors.

Batteries (ISSN 2313-0105) is an international, open access journal of battery technology and materials. It aims to provide a central vehicle for the exchange and dissemination of new ...

Batteries Batteries is an international, peer-reviewed, open access journal on battery technology and materials published monthly online by MDPI. The International Society for Porous Media ...

Lithium-ion batteries are one of the critical components in electric vehicles (EVs) and play an important role in green energy transportation. In this paper, lithium-ion batteries ...

Anode-less sodium metal batteries have drawn dramatic attention owing to their high specific energy and low cost. However, the growth of sodium dendrites and the resulting ...

Green batteries, designed through eco-conscious strategies, aim to address these concerns by incorporating renewable materials, non-toxic components, and energy-efficient ...

Solid-state lithium-ion batteries are gaining attention as a promising alternative to traditional lithium-ion batteries. By utilizing a solid electrolyte instead of a liquid, these batteries offer the ...

Special Issues Batteries publishes Special Issues to create collections of papers on specific topics, with the aim of building a community of authors and readers to discuss the latest ...

Based on data gathered from completed and ongoing electric and hybrid aircraft projects, this study deals with
