Batteries Batteries is an international, peer-reviewed, open access journal on battery technology and materials published monthly online by MDPI. The International Society for Porous Media ...

Aqueous zinc batteries, mainly including Zn-ion batteries (ZIBs) and Zn-air batteries (ZABs), are promising energy storage systems, but challenges exist at their current ...

Batteries being the premier open-access journal for the battery community fulfils a crucial role in disseminating important breakthroughs to relevant stakeholders. Congratulations ...

Solid-state lithium-ion batteries are gaining attention as a promising alternative to traditional lithium-ion batteries. By utilizing a solid electrolyte instead of a liquid, these batteries offer the ...

Anode-less sodium metal batteries have drawn dramatica attention owing to their high specific energy and low cost. However, the growth of sodium dendrites and the resulting ...

Green batteries, designed through eco-conscious strategies, aim to address these concerns by incorporating renewable materials, non-toxic components, and energy-efficient ...

Batteries (ISSN 2313-0105) is an international, open access journal of battery technology and materials. It aims to provide a central vehicle for the exchange and dissemination of new ...

Special Issues Batteries publishes Special Issues to create collections of papers on specific topics, with the aim of building a community of authors and readers to discuss the latest ...

Based on data gathered from completed and ongoing electric and hybrid aircraft projects, this study deals with

the suitability of many different types of lithium-based batteries ...

Lithium-ion batteries are one of the critical components in electric vehicles (EVs) and play an important role in green energy transportation. In this paper, lithium-ion batteries ...

Batteries and green molecules are essential for reaching net zero. Batteries provide short-term grid flexibility, while green molecules decarbonize hard-to-abate sectors.
