What is a treatment area in an EMS Station?

Treatment areas in EMS stations are designed with patient comfort and staff efficiency in mind. Rooms are spacious enough to accommodate essential medical equipment and personnel movements, with ergonomic furniture to support staff during long shifts.

What makes a good EMS station design?

Proper storage and easy accessibility of medical equipment are vital in EMS stations. Design solutions include modular storage systems that can be easily adjusted to accommodate different types and sizes of equipment. Achieving hygienic and sterile environments is a cornerstone of EMS station design.

What should a EMS Station include?

Another special space your station should include is a place for providers to exercise. Consider the specific workouts and equipment your providers are most likely to need and use. Where a firefighter might need to lift heavy weights, an EMS provider may be better served by a rowing machine, says Rodriguez.

What are Maryland's designated EMS base stations?

Maryland's designated EMS Base Stations provide quality on-line medical direction to the State's EMS clinicians. The following information comprises a toolbox for EMS Base Station staff to sustain and improve the quality of their programs.
