How does the ambient weather station work?

This advanced array transmits data to your customized weather dashboard on the interactive Ambient Weather Network faster than traditional wind cup designs. Your new Ambient Weather Station is designed to integrate seamlessly with the Ambient Weather Network --our ad-free weather platform.

What is a weather station & how does it work?

It consists of multiple sensor devices, which can effectively monitor the wind speed, wind direction, rainfall, UV, solar radiation, air pressure, temperature and humidity, noise, light, soil moisture conductivity, etc. We also have integrated weather station, ultrasonic weather station, and so on.

What is the ambient weather WS 5000 ultrasonic smart weather station?

The Ambient Weather WS 5000 Ultrasonic Smart Weather Station offers professional and precise weather monitoring for both home and industrial use. Expand the capabilities of your WS-5000 Personal Weather Station with these accessories.

What is a multi sensors weather station?

Multi sensors weather station is a professional industrial and agricultural weather station. It consists of multiple sensor devices, which can effectively monitor the wind speed, wind direction, rainfall, UV, solar radiation, air pressure, temperature and humidity, noise, light, soil moisture conductivity, etc.

The Ambient Weather WS-5000 Ultrasonic Smart Weather Station is the most sophisticated home and light industrial weather station we have ever created.
