2025 has been a challenging year for renewables. The new tax law, commonly referred to as the One Big Beautiful Bill Act, rolled back many clean energy tax credits and imposed new ...

Let's face it - everyone from Elon Musk's interns to your neighbor with solar panels is talking about power storage investment. But who actually needs a deep dive into profit ...

Storage economics rely on surplus renewable generation conditions, where high storage revenues will generally correspond to low renewable revenues. A flood of early-stage ...

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of ...

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests ...

The US Energy Storage Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new industry ...

Traditionally, for solar and wind projects, this has been accomplished with a long-term offtake agreement, which can cover payments for delivered energy, capacity, or ancillary ...

Integrating Battery Energy Storage Systems (BESS) with wind energy plants can significantly enhance profitability through optimized energy arbitrage, revenue stacking, and ...

In order to develop a scientific and reasonable revenue sharing scheme, this section constructs the energy
